CATALOGUE

OF

New, Rare and Beautiful

FLOWER, GARDEN SEEDS,

ETC.

FOR THE SPRING OF 1888.

GROWN AND IMPORTED BY

JOHN SAUL,

Nurseryman, Seedsman, Florist and Importer

WASHINGTON, D. C.

SEED AND FLORAL STORE—621 Seventh Street, Opposite U. S. Patent Office.
NURSERIES AND GREENHOUSES—On Seventh St. Road.

SPRINGFIELD, OHIO:
Globe Printing and Publishing Co.
1887.
IN preparing the present edition of our Seed Catalogue, our desire has been to give a selection of the most choice flowers, avoiding the long list of names usually given in catalogues, a great part of which are of no value in our climate. Having been engaged over thirty years in growing and harvesting seeds—flower and vegetable—we flatter ourselves we can safely select the finest varieties, and such as cannot fail to please amateur cultivators, as it is very difficult for an inexperienced person to select from the long list usually given. Being extensively engaged in importing and growing the new and rare plants and florists' flowers, it will be readily seen that our facilities for saving seed of the choicest description are unsurpassed. The seeds are of a quality which growers alone can offer; whilst such articles as it is necessary to import are received direct from the first growers in England, France and Germany.

We guarantee that all seed sold by us shall prove to be as represented, to this extent: that should they prove otherwise, we will replace them or send other seeds to the same value. But we cannot guarantee the crop any further than the above offer, as there are so many causes which operate unfavorably in the germination of seeds and maturity of the crop, over which we have no control. Among the causes of failure may be mentioned unfavorable weather, which is one of the most important. The soil may be in proper condition when the seed is planted, but the weather which follows may be cold and wet, which will cause the seed to rot; or it may be hot and dry, which destroys the germ before it shows itself. The soil may also be unfavorable for the variety of seed planted. The seeds may be and are frequently destroyed by vermin of various kinds. And lastly, changes not unfrequently occur, especially among new hybridized varieties, by which frequent sports are produced which give the planter the idea that his seeds are badly mixed. Such occurrences are beyond the power of man to prevent, and for such we cannot be responsible.

Forward Money with the Order.—Please send money with the order, sufficient to cover the whole bill, to facilitate the execution of your orders. During the busy season, to make out bills for customers, mail, charge, and in a few days receive the money, make the proper credit and send receipt, requires more work than we can possibly perform during the great press of business in the spring.

We decline sending goods long distances C. O. D.

The safe arrival of all seeds guaranteed. If a package is injured or lost, we will replace it as soon as informed of the fact.

Please Write the Orders Legibly in a list apart from the body of the letter to facilitate execution and prevent errors. Orders for plants should be on a separate sheet. This Catalogue Annuls all Former Prices.
Flowering plants are from various parts of the world, temperate and tropical, and their habits are as various. Some are found on mountains, others in rich moist valleys, and again on arid plains. It follows that their treatment must be very dissimilar, and that it is not in the province of a catalogue to give any lengthened cultural directions. We will only offer a few general remarks on seed growing.

In this latitude (Washington) nearly all the Hardy Annuals can be sown in April—say from first to middle—considering the season and the condition of the ground; whilst the more tender varieties—natives of warm climates—should not be committed to the ground before the middle of May. Such tender plants as Double Zinnias, Cilanthus, Dampieria, Cypress Vine, etc., should not be sown before the latter season, as they are natives of warm climates; and when sown early, and the ground is cold, they frequently perish. When this occurs, the blame is, of course, placed on the seedsman; when, had they been sown in proper season, success was certain.

**Hardy Perennials**—The common and large-seeded kinds may be sown in the open borders any time in April, but the rare and more delicate species will succeed with greater certainty if raised in a close frame, with or without bottom heat. Thus treated, nearly all will flower the first season if sown early or planted out the early part of May. All those with very small seeds should be sown under glass. Amateurs will do well to bear in mind that though many Perennial seeds vegetate as quickly as those of Annuals, there are some others which usually remain dormant for weeks, and even months. To this class belong the Cyclamens, Paeonies, Fraxinella, etc. Our native Perennials are best sown in autumn, or as soon as gathered, and they will then vegetate the following spring. As this is not always practicable, the plan of sowing the seeds before sowing, for twenty-four hours may be adopted with great advantage in many cases. Half-hardy Perennials require the same treatment as hardy Perennials, differing only in their need of winter protection.

Greenhouse and hot-house seeds need a moist, warm temperature, such as the propagating-house or hot-bed frames. All seeds sown in frames or houses require shading, in bright weather, during the middle of the day, especially as spring advances. For all seeds sown in pots, under glass, a compost composed of well-decomposed leaf mould, sand and sandy loam, will answer very well. Sow very thinly; cover the seeds with about their own thickness of soil. After the germination has once commenced, the surface of the soil should on no account be allowed to become dry. Very small seeds, such as Mimulus, Lobelia, Calceolaria, etc., should not be covered with soil, but be sprinkled thinly on the soil, which should be previously watered from a fine hose. Chinese Primula germinates best when covered with a layer of damp moss. The seed often fails to grow from being too deeply covered with soil, and many other failures are attributable to the same cause. A writer in the "Garden London" makes the following remarks on the germination of seeds: "I have, at the present time, two kinds of shrub seeds just appearing above ground, that have been sown, as nearly as possible, two years. In the ordinary course of affairs, many people, not understanding their nature, would have thrown them away at least eighteen months ago and blamed their seedsman for sending them bad seeds. Primula Japonica, if kept till spring, or until it has become thoroughly dry, will not germinate for at least a year, and sometimes two, and the same holds good in the case of many hardy plants.

**ALL FLOWER SEED SENT BY MAIL, POSTAGE FREE.**

For the convenience of persons unacquainted with plants, we have for some years put up the following collections, which are varied to suit different latitudes, among which are seeds of our own finest strain, which cannot be excelled. They have invariably given the greatest satisfaction.

**COLLECTIONS OF FLOWER SEEDS.**

FLOWER SEEDS IN COLLECTIONS.

Aster, quilled German—Collection of 8 distinct varieties... 50
Victoria—Collection of 6 splendid varieties. 75
Globe—Collection of 12 splendid varieties. 75
Cocarde or Crown—Collection of 6 splendid varieties. 75
Goliath—Collection of 6 splendid varieties. 50

Dwarf Chrysanthemum—Flowered, 6 splendid varieties... 75

These Asters are of the very finest description, and have taken the first prize at almost every exhibition where they were shown.

SEEDS OF BEAUTIFUL NEW AND RARE PLANTS.

Ageratum. Little Dorris—New white, a charming dwarf bushy variety, with white flowers, an exact counter part of the well known blue variety...$ 50

Aster, Comet deep rose—Pure deep rose flowered variety of a new tribe introduced last season, with very large and extremely double flowers similar in shape to the Japanese Chrysanthemum. 50

Aster-Triumph, deep violet flowers measure from 2½ to 3 inches across and are of the most faultless Paeony-form, all petals, being beautifully incurbed. The color is peculiarly rich and brilliant, when compared to those of a pure scarlet, but let but a single flower in full bloom it changes to a magnificent satiny deep scarlet, presenting these two brilliant colors a lively sight. This novelty is conceded to be the most perfecting from the above and all dwarf Asters cultivated. 50

Amaranthus. Tri-colored Splendens—Special selection from trio-colors. The seeds were saved from specimens remarkable for the brilliancy of their coloring. 25

Amaryllis—(Saul's)—From my unrivaled collection. Saved from the finest named flowers which have been carefully hybridized. Seed should be sown as soon as gathered. Ready May 1st. 50

Harlequin half dwarf—In this new (Harlequin) the petals of the flowers are very irregularly colored as it happens often with Zinnias, the same plant may show a great variety of variously blotched and streaked flowers. 50

Acrionium Roseum, New Double—A distinct double form of this pretty Annual promises all the delicate tints and shades of color peculiar to the single variety. 50

Aquilegia. Chrysanthas—This is unquestionably one of the finest Perennials. Its large, golden yellow, long-spurred flowers produce every variety from densely-tufted plants which maintain a long succession of bloom. 75

Chrysanta Cerula—A striking novelty grown in our nursery. A counterpart of the last with flowers of a beautiful blue. 10

Wittmamiana—This is a remarkably fine new species, with very large purplish-blue flowers. 10

Abutilon—(Saul's)—Saved from my fine collection of new flowers. 20

Bells perennis fl. pleno "Longfellow"—A new variety with very large and double flowers of a lovely dark rose color, which are borne on unusually long and stout flower stems, being therefore a great acquisition for cut flowers; nearly constant for seed. 25

Alba Plena—Saved from extra double white flowers, very handsome, constant. 20

Begonia (Saul's) Tuberous-rooted—These novel and beautiful flowers will be found splendid for the summer and autumn decorations of the garden, for they produce the utmost profusion magnificent flowers of very large size, and great variety in color. The tuberous root during the pure months is pure months similar to Gladiolus, and can be easily re-started into growth in the spring. Their profuse flowering quality, and the charming variety of color of their blossoms, render them extremely lovely and effective. Saved from our rich collection. 15

New Hybrid Tuberous—Blooming during fall and winter. Fine mixed. 25

Balsam, double—Collection of 4 distinct varieties. 75
CAMELIA—Collection of 8 distinct varieties. 75
Camellia—Collection of 6 splendid varieties. 75

These Balsams are extremely beautiful, and cannot be surpassed. 1.00

Heartsease—Collection of 6 beautiful varieties. 75
Hollyhock, Double—Collection of 6 distinct varieties. 1.00

Larkspur—Double dwarf German rocket. Collection of 12 distinct varieties. 75
Double Dwarf Larkspur—Collections. 50

Stocks—German Ten Weeks. Collection of 8 distinct varieties. 50

Tuberos rooted, New Double Mixed—Splendid quality saved from our collection, which is one of the nicest Shridhi—Very handsome white flowering. 50

Chrysanthemums (Saul's) 'Paris Daisy or Marguerite'—Etoile d'or, fine yellow. 10

White varieties, mixed. 10

Indicum Pleno—Large double Chrysanthemum, from my rich collection. 10

Candytuft, Empress—If any variety of Candytufts of recent introduction, the present variety is certainly one of the finest of them. It is intermediate in height between the old Rocket and the newer Tom Thumb sort, is the finest, and assumes, when fully grown, and covered with large trusses of pure white flowers, a very handsome candelabra-like aspect. 20

Clematis (Saul's) Jackmanii—(Strain)—The seed offered was saved with care from our magnificent collection of these lovely climbers. Should be sown when ripe in fall; if kept till spring it frequently will not vegetate until the following autumn or spring. 25

Clarkia, Mrs. Langtry—A novel and exceedingly beautiful form of Clarkia. The petals—when seen on the edge (i.e. are wholly petaled)—the color of the flower being purest white, with an evenly defined disc or center of brilliant carmines crimson. 10

Colesus—(Saul's)—This has been saved with care from our rich collection, which embraces all the fine new American varieties, as well as European. 20

Cyclamen, Persicum—Very fine strain, mixed. 25
Album—White. 25
Atrombium—Dark red. 25
Giganteum—Much larger than Persicum. Fine colors. 50
White and Purple—Separate colors. 50

This is a beautiful new strain of very large flowers and rich and varied colors. 50

Caelianthus—A Quadrumaploses Foliis, richly colored, having highly variegated foliage plants, we offer the richest strains. 25

Hybrida—From the most beautiful varieties. 50
Hybrida—A very fine strain. 25

Striata—New striped, will produce 15 to 20 Carnation striped flowers similar to a Bizarre. 30

Tigrina pulvima compacta, dwarf tigered—Strain combining compactness of habit, with brilliancy and diversity of color. 75

Shrubby—Fine mixed. 50

Cineraria hybrida pleinissima—New double saved from the finest double flower. 50

Saved from the finest strain in cultivation. 25
Hybrida—Large flowers, pure white. 50
Hybrida—Brilliant blue. 50
Hybrida—Red, lustrous. 50
Hybrida—Dwarf, large flowered. 50

Grandiflora—Finest large flowering; unsurpassed for diversity and richness of color, as well as for size and perfection. 50

Grandiflora Nana—Large flowering, semi-dwarf varieties; splendid strain. 50

Dahlia (Saul's) Single—Having imported and flowered the parent stock of these fine varieties, the introduction, seed has been saved from the same with great care. The colors consist of shades of mauve, pink, cerise, orange, crimson, yellow, purple and striped varieties. 20

Paragon Strain—Saved from my fine varieties of "Paragon." Many extremely chaste and most beautiful varieties. 20
Dahlias (Saul's) Double—Our collection of this magnificent flower is unsurpassed in this country or Europe. Saved with care. Mixed.......................... 10
Pompone—Mixed. Saved with great care from our prize collection.......................... 10

Dwarf Bedding—From our prize collection........................................ 10

Erysimum Pulchellum—A dwarf spreading plant, very hardy, covered with an abundance of yellow flowers in the early spring and during summer.......................... 20

Eschscholzia Croca flora pleno—A beautiful orange scarlet, shading off to salmon red. The flowers are produced in long racemes, and of great beauty. The appearance of the plant in growth being particularly distinct and charming. It is quite as hard as E. Croca, and the flowers are produced in the greatest profusion.......................... 20
Flora pleno alba—Double white.......................... 10
Mandarin—A distinct variety; the outer side of the petals brilliant scarlet, the inner side rich orange; very brilliant in color, and most desirable.......................... 10

Ferns—Spores of the finest species.......................... 10

Gaillardia, New Double (Lorenziana).—The 'Garden' speaks of it as follows:—"A variety of a popular hardy plant, remarkable for the florets of the head being tubular and colored orange and red. The flowers are some 2 inches or 3 inches across, semi-globular in shape, and therefore, very showy.......................... 20

Gloxinia, New French, Tinged and Variegated Hybrids—French growers of this noble flower have raised numerous beautiful spotted and tiged hybrids. The seed I offer has been saved from a selection of the finest.......................... 10

Godetia Cavanillesi—New species from Chili. 15 to 3 inches high: loose, long, reddish-orange, flowers nearly 1 inch in diameter, of a brilliant dark blood-red color, which does not exist amongst the whole collection.......................... 10
Lady Shering has this curious plant always been admitted to be the most unique introduction. Whether grown in groups in the garden or in pots in cold frames for ultimate conservatory decoration, it is unequalled for brilliancy and general beauty.......................... 10
Duchess of Albany—New white. The plants are about one foot high, branching from the bottom, and producing large clusters of flowers-like flowers of a beautiful glossy, satiny white, each about 4 inches across when fully expanded. Profusely covered with tufts of flowers which entirely hide the foliage.......................... 10
Spotted Carpet—A charming petite variety of this popular genus: the plant is very dwarf, forming a curious bush (hence its appellation) and bearing myriad of exceedingly chaste and pretty, flowers of pure white ground, but with a bright carmine rose spot at the base of each petal.......................... 10

Geranium Zonale (Saul's)—From the latest novelties. Mixed.......................... 15
Apple Scented—Pure seed, own saving.......................... 20

Helichrysum—Fire ball, New double crimson, a very brilliant everlasting.......................... 20

Hollyhocks—The seed offered is from one of the finest English collections. Mixed.......................... 25

Impatiens Sultana—Very pretty new Balsam, introduced from Tropical Africa, of nert dwarf habit of growth. The flowers, which are produced most profusely and in perpetual succession, are of the richest carmine red, and appear in auxiliary coryms; the spires is narrow, about 13 inches long, and flesh colored.......................... 25

Mina Lobata—The genus Mina is closely allied to Ipomoea and resembles in growth and its three-lobed foliage the several species of this family, but totally different. The flowers, which are produced most profusely and form their charming and lovely colors. The flowers appear on fork-like racemes, bearing themselves upright or almost erect out of the dense and luxuriant foliage, and presents thus with their bracelets of colors an extraordinary aspect; the flowers are, as buds at first, bright red, but change through orange yellow to yellowish white when in full bloom.......................... 25

Mignonette, Golden Queen (Carter's)—A remarkably distinct yellow-flowered variety was recorded as Golden Queen. The Floral Committee when recently visiting慈wicke, signed their appreciation of this variety by awarding the coveted \\

Crimson Queen—A new, distinct and desirable variety for pot culture, throwing up numerous stout flower stalks, terminated by extremely broad spikes of delightful crimson flowers. It is a distinct plant and is recordable as a variety of the old Mignonette.......................... 10
Few Hybrid Spiral (Mile's)—A variety growth and long elegant spikes. Very fine mixed.......................... 10
Pyramidal—Large flowered. This is a grand variety of the old Mignonette, with the elegance of the high flowers and the rich plates. Very fine mixed.......................... 10
Machet—A new variety, of fine dwarf habit and pyramidal growth. Very fine mixed.......................... 10

Nasturtium, Empress of India—Splendid brilliant crimson scarlet, dwarf and compact.......................... 10
Lady Bird—Rich golden yellow, each petal barred with a small crimson spot. Very fine mixed.......................... 25
Chameleon—(New). Very fine mixed.......................... 10

Leptosyne Maritima—Mid-winter Sunflower; grown in pots it blooms during winter in a greenhouse.......................... 10

Pansy, or Heartsease—The seed offered is from one of the finest collections in England. A magnificent strain of one of the most handsome, flowers of great substance and variety of color. Very fine mixed—From a choice English collection.......................... 25
Pancy—Nothing can exceed in country and attractiveness these Fancy Pancies. Flowers are large and of good substance. They have a bold quaintness and marvelous variation of color. Fancy Pancies are the most fine in ground and most gorgeous in color; gorgeous, but not gaudy, for many of them are extremely chaste. Extra Selected.......................... 50

Very fine fancy.......................... 25
Butterfly—This belongs to the fancy class, the markings are distinct and striking, rich in color and fine form.......................... 50
Striata Perfecta—Improved striped and variegated kinds of great beauty.......................... 50
New Hybrid Viola or Bedding 'Pansy' (mixed)—This is an entirely new strain of Viola from anything hitherto introduced, and consists of the Viola with all the well defined markings of the Fancy Pancy, from deep black to bright bronze, and striped and spotted in an extraordinary manner. Very fine selected.......................... 50
Candidissima (Snow Queen)—Flowers of a pure satiny white, very pretty.......................... 20
Lord Beaconsfield—Splendid novelty. Flowers large, of deep violet purple, came with a collection of petals to a white hue.......................... 20

Odgers or Blotchted—Superb large-eyed flowers. The favorite Odier Pansies have been of late more and more improved. The flowers are of very good shape, and beautifully blotched with rich and varied colors. My strain has no superior.......................... 50

Trimmer Pansies, Viola tricolor maxima—Dignous and beautiful new race; the flowers are marked with three large blotches or spots. They are a size hitherto quite unattained in this genus. The seed now offered was saved from a finely formed flowers of the richest and most varied shades of color.......................... 50

Petunia, Hybrid, Grandiflora Superbissima—The flowers of this new class of Petunias are of a remarkable size, very regular in shape, with large open center, making it quite distinct from others.......................... 50

Grandiflora variegata—New and fine.......................... 25

Grandiflora alba—Very fine, large pure white flowers.......................... 25

G. Fimbriata “Titania”—Flowers dark velvety purple, admirably relieved by a broad and clearly defined pure white band round the corolla petals.......................... 25

Hendersons strain—Very beautiful strain.......................... 25

Large-flowering—Striped, mixed. Very fine strain, with large and perfect flowers. Very fine selected.......................... 50

Large-flowering—Fringed and striped.......................... 50

Large-flowering—Brilliant red.......................... 25

Dwarf—Compact, striped, inimitable.......................... 25
Petunia—Double—Finest, mixed. Very fine strain... 50
Double—Large-flowering (new). Very fine strain of large double flowers. 50
Double fringed—Very finest strain of these very beautiful flowers. 50

The above varieties are the finest of this beautiful flower.

Double Liliput—New double varieties of the much admired Petunia nana compacta, forming, like the latter, quite dwarf and dense bushes studded with very numerous and exceedingly pretty small double flowers of the most charming colors; they are in part spoted, in part striped, and also self-colored and give to the plants an uncommonly pleasing appearance. 25

Inimitable—Striped and blotched, a splendid and very attractive strain. 10

Dwarf Inimitable—Bushy little plants, 3 to 8 inches in height by as much in diameter, studded with regular striped flowers; very effective. 15

Belle Etoile—A remarkably beautiful strain of the preceding, with larger flowers, highly effective. 15

Nana Compacta Multiflora, or Dwarf Inimitable Petunia—Bushy little plants from 5 to 8 inches high, studded with regular striped flowers; exceedingly effective, whether in masses or in pots. 20

Intus Aurea (Senary)—New, flowers with yellow throat; a very showy variety. 25

Passiflora Coccinea—Bright scarlet Passifloras. 25

Passiflora or Tacsonia Buchananii—Brilliant orange scarlet. 25

Primula Sinensis (Saul's)—Rich Magenta; a very beautiful and bright Primula; not fringed. 50

Fimbriata—Fine Magenta; a bright and beautiful flower. 50

Rosy Purple—A very rich color, distinct and beautiful. 50

Alba—Finest strain. 50

Rubra—Finest strain. 50

Violet Red. 50

Bright Carmine, very rich. 25

Filicifolia, mixed. 50

Double Mixed—Imported, a fine strain. 75

Double, Red, Pink and White—Separate, each. 75

The above Primulas may be relied upon, as they have been saved from finest hybridized flowers in my establishment. 25

Obconica—A new Primula of the easiest culture, nearly constantly in bloom, but most profusely during the winter months. Flowers in large heads on long stems; white, shaded with lilac. 25

*Phlox, Steliate Splendens*—"Grandiflora Splendens" is the richest colored and most effective of all the Phloxes. An exact idea of the present novelty can be formed by picturing to one's self that variety, but with the difference that the center of its vivid crimson flowers is occupied by a clearly defined pure white star. 10

Flora Pleno—Double scarlet Phlox. 25

Alba Pleno—Double white. 25

Papaver "Danebrog"—New single-flowering Poppy of striking effect. The flowers are of a brilliant scarlet color, bearing on each of the four petals a large silvery white spot, forming thus a white cross on scarlet ground, similar to the Danish or Swiss national banner. A very desirable, showy novelty. 15

Victoria Cross Poppy—This is a selection from the new Danebrog, and it is impossible to fitly describe the brilliant beauty of the flowers. The center represents a Maltese cross of white with an outer zone of amber stamens, the disc radiating in yellow bars upon a bed of green. The larger surface of the petals is of a rich vermillion. 50

Salvia Creggii (new)—A pretty new species which I have just introduced from Texas. This has long spikes of rose purple flowers; a continuous bloomer, very compact habit, and nearly or quite hardy in this latitude. 10

Sweet Pea, Violet Queen—It is dwarfer in habit than the other varieties, the flowers ranging in color from deep mauve of the keel to light violet of the guard petal, suggestive of the beautiful Bougainvillea. 10

Adonis (new)—A charming rose pink. 20

Torenia Fournieri—A very fine new Annual, with large sky-blue flowers, having three large spots of a dark indigo blue, and a bright yellow stain in the center of the flower. Continues blooming during summer and autumn. 10

Belloni—A very beautiful and distinct species from Cochran China, bearing bright yellow flowers with a purplish brown tube, similar in habit to T. Asiatica. Continues flowering during summer and autumn. 15

Wallflower—Blood, good extra fine dark. 10

Old Gold—Deep rich golden yellow. 10

Zinnia, New Double Giant—Very vigorous large flowered variety. 20

New Striped, or Zebra—A distinct and beautiful variety, finely striped. 20
A General List of Flower Seeds.

ANNUALS.

Alyssum.

Alyssum Sweet (Koniga Maritima). White, very sweet hardy annual........................................ 05
Ambrosia Mexicanana.................................................. 05
Alonsoa Linifolia. A pretty, graceful plant; flowers scarlet ..................................................... 05
Ageratum Mexicanum. Blue............................................. 05
Album; white................................................................. 05
Duchess of Edinburgh (new); bright blue......................... 05
Imperial Dwarf; very deep, extra white......................... 05
Tom Thumb; dwarf, blue.................................................. 05
John Douglas; blue, very dwarf and compact.................... 10
Lasseauxii; rose color.................................................... 10
Mixed varieties........................................................... 05

All are very fine for bedding out during summer or for winter blooming in the greenhouse; fine for bouquets.

Amaranthus, caudatus (Love lies bleeding); flowers drooping, blood red........................................ 05
Caudatus gibbosus; very distinct variety............................ 05
Hypochondriacus (Prince’s Feather); deep blood red........... 05
Melancholcus ruber; large deep blood red foliage................ 05
Nobilis pyramidalis (new); flowers, as well as leaves, of a rich dark purple................................. 10
Tricolor; leaves red, yellow and green, very showy.................. 05
Salicifolius; leaves bright orange red; an elegant and picturesque plant............................................. 05
Bicolor ruber; yellow and crimson foliage.......................... 05

Sanguinea nana (new); very deep and bright foliage.......................... 10
Speciosus or Giganteus.................................................... 05

The foliage of these plants is remarkably handsome which renders them invaluable for producing effect.

Asperula azurea setosa.................................................... 05

Profuse flowering hardy annual, of dwarf branching habit, with sweet-scented light blue flowers.

Amaranthus.

Asperula.
JOHN SAUL’S CATALOGUE OF SEEDS.

Asters.

Aster. Truffaut’s new Peony-flowered. The finest variety of this popular flower, extra mixed. French, extra fine, double. 10

This is a mixture of Peony-flowered, Chrysanthemum-flowered, imbricated and imbricated Pompon Asters.

Per pkt.

Helianthus.

Ipomopsis Elegans. Long spikes of scarlet flowers. 05
Annanica. Orange. 05
Picia. Orange spotted. 05
Magnificent biennials with spikes of blooms from 1 to 2 feet in length.

Kaufussia Amelloides. Flowers blue, very pretty. 05

Larkspur (Delphinium). Double dwarf rocket. Mixed 05
Double tall rocket; mixed. 05
Double German rocket; mixed. 05
Double German; white. 05
Imperial branching; new. 05
Branching; mixed. 05
All are very beautiful hardy Annuals; they succeed best when sown in the autumn.

Linum Grandiflorum Rubrum. Scarlet, fine. 05
Roseum; beautiful rose. 05
Very free flowering beautiful annuals.

Loftus Jacquebus. A pretty bedding plant, with pear-shaped flowers nearly black. 10
Leptopsiphon Androsaceous. Mixed. 05
Densiflorus; mixed. 05
Aureus; golden yellow. 05
Roseus; rose colored. 05
New French Hybrids; very beautiful, various colors. 05

All are very pretty dwarf annuals.

Lupinus Atrooccineus. A beautiful Lupin. 05
Sulphureus; fine spikes of sulphur colored flowers. 05
Hybridus insignus; purple and white. 05
Dunnetti superbus; pale and yellow, fine. 05
Subserbomus ultramarine blue, crimson and purple. 05
Tricolor, elegans. 05
All the varieties of “Lupinus” are well worthy of a prominent place in every garden, as they are very showy and comprise a great variety of colors.

Marigold, African. Mixed, fine. 05
Carter’s Golden Nugget (new); rich in color. 10
Lemon colored. 05
French double tall striped; mixed. 05
Dwarf striped; mixed. 05
Deep gold striped. Very fine dwarf variety, very free blooming; flowers yellow with a brown center; very showy.

Marigold, Martynia fragrans. Purplish crimson flowers; the young pods are used for pickling. 10
Proboscidea; pods are used for pickling. 05

Martynia. Tricolor; three colored. 05
Album, white. 05
Crystalbium ultramarine blue. 05
Excellent as plants for rockeries, edging for flower beds, etc. “Crystallium,” the well-known Ice Plant, is excellent for garnishing.
Mathiola Bicornis  Night scented stock. 05

Interesting as emitting a delicious perfume after sunset.

Mimosa Pudica. Sensitive Plant. A well-known pretty plant: a hardy annual. 05

Mathiola

Mignonette, (Roseda odorata) 05

Large flowered 05
Parson’s new white 05
Pyramidal; large flowered 10
Miles’ new Hybrid Spiral 10
New dwarf compact; a very compact variety 10

We offer all the varieties of this popular annual. The well-known varieties require no special notice. We specially recommend the spiral as the finest for pot culture.

Mimosa Pudica.

Nasturtium (Tropaeolum). Tom Thumb: scarlet 05
Empress of India 10
Spotted 05
Golden King of Tom Thumbs 10
King of Tom Thumbs 05
King Theodore 10
Lady Bird 10
Bronze Tom Thumb 05
The Pearl 05
Rose 05
Yellow 05
Mixed 05
Minus, dwarf Nasturtium 05
Coccinea, scarlet 05
Mixed 05
Dwarf Nasturtium 05

These deservedly popular annuals are certainly worth more notice than they even at present enjoy. If arranged in colors as bedding plants, or sown in mixture, the dwarf varieties rival in richness the finest effect that could be produced by the most expensive bedding plants. We do not know a class of plants so inexpensive in production yet so useful and effective.

Nemopyila Insignus. Bright blue 10
Maculata; white petals tipped with blue 05
Discoidalis; velvety black, edged with lilac 05
Nicotina. Large purple flowering tobacco 05
Nierembergia Frutescens. Lilac and white; an exquisite bedding plant 10
Gracilis 10

Nierembergia

Cenothera Drummondii Nana. Yellow, large and showy 05
Jamesianum; fine species with large yellow flowers 10
Lamarkiana; yellow, flowers 3 to 4 inches in diameter 05
Purpurea; purple 05

Excellent showy class of plants, suitable alike for rockeries, shrubberies, borders or beds.

Oxalis. Torpaolides. Copper leaves and golden flowers, very showy for edging 10
Rosea; rose colored 10
Vulvidiana; of dwarf growth, producing masses of bright yellow, fragrant flowers in long continued succession 10

Perilla Nankinensis. Fine crimson, bronze foliage 05
Poppy Carnation. Striped 05
Scarlet; large scarlet 05
Double mixed; black 05
Ranunculus flowered 05

Nierembergia

Nasturtiums

</table>
In offering to the public my stock of Garden Seeds, I do so with great confidence; all are new, fresh and of the finest description. Special attention is given to the selection of such varieties as succeed best in the Middle and Southern States, which, from my long and extensive experience, I can select with confidence. Such varieties as are best grown in this country are either grown by myself or by experienced growers by contract for my trade; whilst those varieties it is found necessary to import I receive from the most reliable growers in England and the continent. All Garden Seeds by the ounce will be prepaid by mail—when 1/2 pound and upwards are ordered, 16 cents per pound and 25 cents per quart must be added for postage—as well as on all articles marked thus: when this is omitted, an amount equivalent to the postage will be deducted from the order.
